SUMMARY

Site Reliability Engineer with years operating and scaling enterprise Linux and cloud-native environments, including deep expertise in Kubernetes and Red Hat OpenShift on Azure. Proven track record ensuring high availability of production infrastructure, leading cloud migrations, and driving reliability and automation initiatives across distributed global teams. Passionate about observability, incident response, and automation.

WORK EXPERIENCE

Amadeus - Site Reliability Engineer

Miami, FL | 10/2022 - 10/2025

- Engineered and operated multiple Red Hat OpenShift Kubernetes PaaS environments on Microsoft Azure, ensuring high availability for mission-critical airline production workloads.
- Led on-premises to cloud application migrations, coordinating cross-functional teams and minimizing disruption through rigorous runbooks and change management.
- Drove observability improvements by integrating Prometheus, Grafana, and Splunk for real-time monitoring and alerting across distributed environments.
- Optimized cloud infrastructure spend through workload right-sizing, achieving approximately \$70K in annual cost savings while maintaining performance SLAs.
- Mentored a distributed international team on OpenShift SRE practices, expanding global support coverage and improving operational resilience.

Amadeus - System Engineer

Miami, FL | 10/2014 - 10/2022

- Triaged and resolved complex incidents in airline IT infrastructure, managing high-priority escalations with full root cause analysis and post-mortem documentation.
- Built a Python-based automation tool to analyze software load failures, surfacing recurring error patterns and enabling targeted remediation.
- Designed incident and problem ticket tracking dashboards, eliminating hundreds of recurring issues and improving customer-facing uptime.

Mariner Systems - System Engineer

Miami, FL | 09/2011 - 09/2014

- Managed enterprise 24/7 operations including system recovery, performance troubleshooting, and monitoring for clients including Coca-Cola, AmerisourceBergen, and Dole.
- Directed a project to mass-produce reimaging USB tools for 800+ units, enabling in-field recovery and eliminating costly equipment returns.
- Administered in-house networking, web hosting, and digital advertising infrastructure for high-uptime client environments.

SKILLS

Cloud and Infrastructure: Kubernetes, Red Hat OpenShift, Microsoft Azure, AWS, Docker, Terraform, Linux, MS Hyper-V, Apache

Observability and CI/CD: Prometheus, Grafana, Splunk, Jenkins, GitHub Actions

Languages and Tooling: Python, SQL, Jsonnet, HTML, CSS, PHP, Jira

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | Azure Fundamentals (AZ-900) | AWS Cloud Practitioner | ITIL Foundations

EDUCATION

Florida International University

Miami, FL

Bachelor of Science - Information Technology
